11) On the right you can see the timetable, click on it.

The programme's mission is to train generalists in public administration who will be well versed in theories of public administration, as well as possess the necessary skills for solving problems related to the public sector. The programme consists of three core components: economics, administration and law. Moreover, the programme's key advantage is the high level of economic education it offers, which can be used to compensate for the lack of economic rationale frequently found in government decision-making. In addition to microeconomics and macroeconomics, students receive theoretical and practical training in such fields as public finance, municipal and entrepreneurial law, information systems and public sector technologies.
